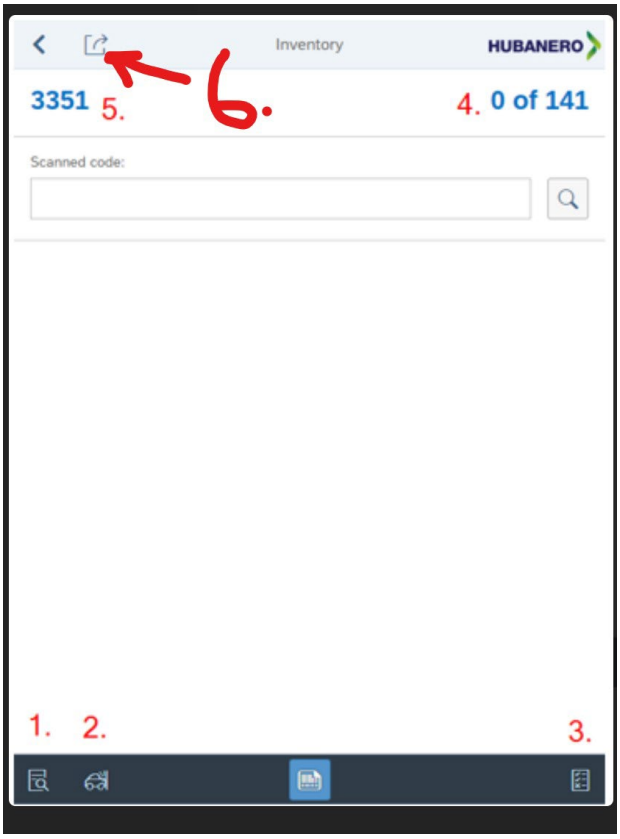
Arbeidsinstruks for inventory (CT)

Hver onsdag, så må alt av varer på HUB skannes med Hubanero (inventory) + alt av felt som ikke har blitt tatt framplukk på. Lista må sendes til (controltower.coe@elkjop.no) hver onsdag før kl 11.



1. Varedetaljer vil vise mer informasjon om sluttkunden som FU, SO, felt, kundenavn osv.

2. Skaderegistrering med årsak og bilder

3. Viser kolli som ennå ikke er skannet under inventory

4. Totalt av skannet vs total på HUB

5. HUB

6. Trykkes på når det er ingenting mer å skanne. Resten må merkes som «missing».

Etter litsa har blitt sendt til CT og etter CT har behandlet det, sender de tilbake lista med hvem som er ansvalig på hva. Under ser du en excel fil som CT har sendt som også har blitt filtrert på HUB som ansvarlig.

Her er det viktig å sjekke hver FU for å se om ingen av FU har gårsdagen dato for retur til butikk.

Det er også viktig at vi sjekker ordrene som CT mener tilhører RT. Som for eksmpel bilde under. Her ser man at på HUB, så har det blitt skannet HU: 00370727790017293147 fra SO: 2247881821. Men produktet som er på HUB er RS som tilhører RT: 6008155895. Her må vi printe ut nytt etikket, utlevere den gamle HU i POD in ERP i HUB dash og skanne inn det nye etikett og evt endre dato 2 dager frem på RS dersom det er gårsdagen dato på RS.
